AWARENESS PROGRAM

## PERIMETER AND LEASEHOLD SECURITY COMPLIANCE

Los Angeles World Airports (LAWA) Police Division is implementing a system to notify tenants of security deficiencies within their leaseholds.

In working with our Property Division, we have developed the following Priority System for required repairs. These will typically involve loose barbed wire, overgrown shrubbery, bent poles, broken gates/doors, equipment located too close to the perimeter fence, etc.

The urgency of the required repairs and corrections will fall within one of the following categories:

- **Priority 1 - Repairs must begin within 2 days of above date.**  
Immediate repair is needed to meet minimum TSA standards and LAWA regulations.
- **Priority 2 - Repairs must begin within 14 days of above date.**  
Cited deficiency(ies) is/are in violation of the LAWA Airport Security Program.
- **Priority 3 - Repairs must begin within 30 days of above date.**  
Repair(s) needed to increase physical security of the Airfield Operations Area.

The perimeter fence is the first line of physical security at LAX. It is crucial that it be maintained to the highest standards as set forth in our Airport Security Program.

If you have any questions or comments, please feel free to contact the Airport Security Coordination Unit at (310) 215-5450 or the Airport Police Operations Center at (310) 646-0200.
